LIGHT's EXPERIENCE – INVITATION

Conference dedicated to light

Summary

Dramatic changes are unfolding in light and lighting technology. Solid-state technology are already demonstrating strong performance projecting a significant market share at an unprecedented pace. The challenge is to develop high-power devices that emit high-quality white light, while meeting targets for efficiency, longevity, and manufacturability and most important-cost.

- This new light source would change the way we live and the way we consume energy.
- New criteria related to light perception.
- Potential to energy saving.
- The Solid-State Technology will change the way lighting systems and buildings are designed and used.

What represent LIGHT's EXPERIENCE Conference?

As is mentioned even in the title it is an event that aim to bring together those that experienced light. Those interested in the lighting field starting from design, construction ending application stage and measurement. It is an opportunity to meet professors, industry's specialists as well officials.

Registration

Last date for registration: March 15, 2019.

Last date for abstract submission: April 01, 2019.

SIELMEN Conference link

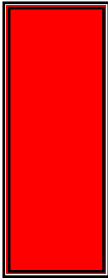

The academics and practitioners, will have also the opportunity to present their papers at 12th International Conference and Exhibition on Electromechanical and Power Systems (SIELMEN 2019), prior this event on 10-11 October in Chisinau. Conference organizers:

Faculty of Electrical Engineering, „Gheorghe Asachi” Technical University of Iasi, Romania

Faculty of Power and Electrical Engineering, Moldovan Technical University of Chisinau, R.Moldova

Faculty of Electrical Engineering, University of Craiova, Romania

Partners:

IEEE Romania Section
World Energy Council – Romanian National Committee

- **June 10, 2019** – full paper submission
- **July 22, 2019** – notification of acceptance
- **September 08, 2019** – submission of full papers & early registration payment

More details on the conference website:
<http://www.sielmen.ucv.ro>

Topics-objectives

- New lighting technologies. Light quality and human light influence on human.
- Regulations, Standards, Metrology
- Control and Connectivity.
- Development trend.
- Lighting Technology and advance lighting systems sustainability.
- Sharing Experience with field's specialists.
- Establish new contacts in your field
- Information Opportunities
- Sharing Lighting experience and new ideas
- New application in Medicine and Biotechnology

Costs, Sponsorship

Details on CNRI web site or CNRI Secretariat. Sponsorship letter is available on request otherwise uploaded from web site.

Contact
